Here are 5 key data points from their July 2nd news release titled, “*DMG Blockchain Solutions Announces Preliminary June Operational Results*”:

- **Strategic Expansion Secured:** DMG executed a binding agreement to develop a new Bitcoin mining facility outside British Columbia, leveraging low-cost renewable energy. The new site is expected to add approximately 1 EH/s of capacity by H2 2026, supporting long-term operational efficiency.
- **Progress Toward 3 EH/s Target:** The company reaffirmed plans to reach 3 EH/s by the end of 2025, beginning with a pilot hydro deployment this summer at Christina Lake, aimed at optimizing performance and transitioning to direct liquid-cooled mining.
- **Resilient Bitcoin Holdings and Deleveraging:** DMG ended June with 341 BTC, using part of its monthly production to fund operations and reduce its loan balance with Sygnum Bank, consistent with previous guidance.
- **Infrastructure Improvements Underway:** Challenges with hydro mining systems are being addressed through alternative sourcing from best-of-breed vendors, improving quality control and future-proofing DMG’s infrastructure for high-temperature efficiency.
- **Government Engagement & AI Opportunity:** DMG is advancing discussions with Canadian government agencies, including the Department of National Defence, as part of its strategy to align with Canada’s AI-driven military modernization and compute infrastructure needs.
