

Nerds On Site CEO Warns Businesses on Data Risks from Public LLMs like ChatGPT, Highlights Revolutionary Cybersecurity Solution and Strategic Growth Initiatives

written by InvestorNews | April 15, 2025

April 15, 2025 – [Nerds On Site Inc.](#) (CSE: NERD | OTCQB: NOSUF) is boldly tackling what CEO Charles Regan calls “the number one industrial espionage center on the face of the Earth today”—the misuse of public large language models (LLMs) like ChatGPT. In a recent interview with [InvestorNews.com](#) host Tracy Hughes, Regan highlighted the company’s ambitious private LLM project aimed at protecting client data, calling privacy “crucial” and client information “sacrosanct.” He emphasized the risks businesses face by unwittingly uploading sensitive data to public platforms, noting that “there are criminals out there who take as much data as they can” and exploit it commercially, often without users’ knowledge.

Addressing the urgency of cybersecurity in today’s digital marketplace, Regan explained that Nerds On Site is developing a solution that provides businesses with the analytical advantages of an advanced AI tool while safeguarding their confidential information. This private LLM allows organizations to securely analyze historical data and identify strategic growth opportunities without ever exposing their proprietary information to external entities. As Regan pointed out, “it will never share your information up to that public space,” providing

users with the benefits of powerful language models without the associated security risks.

Beyond cybersecurity innovations, Nerds On Site continues to strengthen its market presence, currently servicing over 12,000 clients across North America with more than 70 tailored technology solutions. The company's offerings include comprehensive cybersecurity protection, managed security services, and around-the-clock remote IT support through Nerds On Line—a service that, for a flat monthly fee, provides unlimited technical assistance. As part of their growth strategy, Nerds recently established NOS Technical Services Inc. and launched a major North American marketing initiative following significant revenue gains, reflecting their sustained commitment to innovation, profitability, and customer satisfaction.
