Tom Drivas on how Appia is unlocking the dual potential of rare earths and uranium

written by InvestorNews | October 26, 2023

In a recent InvestorNews interview, host Brandon Colwell sat down with Appia Rare Earths & Uranium Corp.'s (CSE: API | OTCQX: APAAF) CEO and Director Tom Drivas, to discuss the exceptional drilling results from Appia's PCH Ionic Clay Project in Brazil. Discussing the consistency and high-grade rare earths mineralization at the project, Tom highlights that the average grades of Total Rare Earth Oxides (TREO) is comparable to, or surpasses, other well-known international deposits.

Tom emphasized that Appia's ionic clay project in Brazil offers a more environmentally friendly and easily processable source of rare earths. Tom explained that Appia's PCH Ionic clay project has a distinct advantage with its high concentrations of both heavy and light rare earths, a rarity in the industry. Appia also the Alces Lake Project in Northern Saskatchewan. With high-grade monazite mineralization, Tom shares that the Alces Lake Project is also rich in light and heavy rare earths.

With uranium in demand and high-tech and electric vehicles industries relying heavily on rare earths, Appia's dual focus on uranium and rare earths sets the company apart in the critical minerals industry. Tom clarified that while the rare earth projects have gained significant attention, the company remains committed to uranium exploration.

About Appia Rare Earths & Uranium Corp.

Appia is a publicly traded Canadian company in the rare earth element and uranium sectors. The Company is currently focusing on delineating high-grade critical rare earth elements and gallium on the Alces Lake property, as well as exploring for high-grade uranium in the prolific Athabasca Basin on its Otherside, Loranger, North Wollaston, and Eastside properties. The Company holds the surface rights to exploration for 113,837.15 hectares (281,297.72 acres) in Saskatchewan. The Company also has a 100% interest in 12,545 hectares (31,000 acres), with rare earth elements and uranium deposits over five mineralized zones in the Elliot Lake Camp, Ontario. Lastly, the Company holds the right to acquire up to a 70% interest in the PCH Ionic Adsorption Clay Project which is 17,551.07 ha. in size and located within the Goiás State of Brazil.
